SUMMARY

Front-end web developer with a full-stack background and an eclectic professional history that makes me a well-rounded and fun team member.

SKILLS

- Front-end: JavaScript, jQuery, Angular, React, HTML, CSS, Materialize, Bootstrap
- Back-end: Node.js, Express, Knex.js, PostgreSQL
- Version Control System: GIT
- Training: Pair programming, OOP, Agile workflows, RESTful web services, Heroku, NPM
- Other: Inkscape, Adobe Illustrator, Adobe Photoshop

EDUCATION

- Certificate in Web Development - *Galvanize, Inc., Seattle, WA 2016*
 - A 6-month Immersive that dove deep in JavaScript's NEAP stack.
- Associates of Science in Biology - *Bellevue College, Bellevue, WA 2012-2015*
- Completed Course in Web Development - *Coding Dojo, Bellevue, WA 2014*
 - A 14-week course that exposed me to the MEAN stack, LAMP stack, and Ruby on Rails.

SELECTED PROJECTS

Matchday

- Built a web app to help English Premier League soccer fans support and follow their favorite team.
- Used React, CSS, Material UI, and Inkscape for the client application.
- Used Node, Express, Knex, PostgreSQL, Express-Validation, Joi, Axios, and Brunch for the server application.
- Consumed RESTful data from Bing Search API, Football-API, and used the SMS Twilio API services.
- Deployed the app to [Heroku](#) and published the code to [GitHub](#).

Stay Up

- Built a men's fashion look book web app which allows users to browse/save favorite products to their profile.
- Used Angular, HTML, CSS, UI Bootstrap, Font Awesome, and Inkscape for the client application.
- Used Node, Express, Knex, PostgreSQL, Express-Validation, and Joi for the server application.
- Designed a many-to-many, self referencing relational database.
- Deployed the app to [Heroku](#) and published the code to [GitHub](#).

Concert Clue

- Built a web app powered by Bands in Town API, that locates music venues based on users input and location.
- Collaborated with team using agile methodologies and pair programming.
- Used jQuery, HTML, CSS, Materialize, Inkscape, and Google Fonts for the client application.
- Used Node, Express, Knex, and PostgreSQL for the server application.
- Managed issues via GitHub issue tracking and listed with ESLint.
- Deployed the app to [Heroku](#) and published the code to [GitHub](#).

EMPLOYMENT HISTORY

- Glass Artist, *Fused Glass By Celeste* | Brier, WA, 2004-Present
- Assembler 2, *Aerojet Rocketdyne* | Redmond, WA, 2013-2015
 - Assembled, tested, and maintained various types of rocket engines—with specialized tools and electronic equipment—that are used on satellites, space probes, and other spacecraft.
- Certified Pharmacy Technician, *Health Point* | Kent/Bothell, WA, 2010-2012
 - Independently operated and managed a satellite pharmacy in Bothell.
 - Learned and implemented new pharmaceutical software within 1 month.
- Aviation Machinist Mate (AD), *U.S. Navy, NAS JAX/NAS* | Whidbey Island, 2006-2010
 - Maintained all aspects of the C-9B/DC-9 aircraft, T-56 turboprop engine, and 54H60 series propeller for P3 Orion aircraft.
